SUMMARY

Bachelor of Engineering in Computer Science student with hands-on experience in full-stack web development using the MERN stack. Skilled in building responsive web applications, developing REST APIs, and with exposure to Python through a computer vision project. Good understanding of Data Structures and Algorithms using C++ and Python. Passionate about learning new technologies and developing scalable real-world applications.

EDUCATION

Gokaraju Lailavathi Engineering College, Hyderabad 2023 – 2027
B.E. in Computer Science and Engineering | CGPA: 8.91/10

Deeksha Junior College, Hyderabad 2021 – 2023
Intermediate (MPC) | TSBIE | Percentage: 94.4%

St. Ann's High School, Hyderabad 2021
Class 10 | Board of Secondary Education, Telangana State | CGPA: 10/10

SKILLS

Programming	C++, Python, JavaScript
Frontend	HTML, CSS, React.js, Bootstrap
Backend	Node.js, Express.js, REST APIs
Database	MySQL, MongoDB, Mongoose
Computer Vision	YOLOv9, OpenCV, NumPy
Libraries	Axios, Recharts
Authentication	JWT, bcryptjs
Tools & Platforms	Git, GitHub, VS Code, npm, Vite, Figma
Core Subjects	Data Structures & Algorithms, DBMS(SQL), Operating Systems, Computer Networks, OOPs
Soft Skills	Communication, Leadership, Team Collaboration, Time Management

PROJECTS

GlowMax – Full Stack Self-Improvement Platform GitHub **MERN Stack**
Developed a full-stack wellness and productivity platform to track daily health and lifestyle activities such as mood, hydration, sleep, workouts, journaling, streaks, and career roadmaps. Built responsive React.js interfaces with React Router and Recharts for dynamic dashboards and analytics. Implemented secure authentication using JWT, bcryptjs, and MongoDB with protected routes and persistent sessions, and developed RESTful APIs using Express.js integrated via Axios.

Apple Detection and Analysis using YOLOv9 **Python, YOLOv9, OpenCV, NumPy**
Developed Python modules for report generation and post-detection analysis in a team-based YOLOv9 apple detection project and selected for Project Expo. Processed YOLOv9 detection outputs using OpenCV and NumPy to implement apple counting, size estimation, ripeness analysis, and yield prediction. Generates analysis reports from detected bounding box information to support orchard monitoring.

Browser Game + Score API GitHub **Node.js, Express.js, JavaScript**
Developed a browser-based reflex game featuring a live leaderboard for tracking high scores. Built RESTful APIs using Express.js to store and retrieve player scores dynamically, integrated frontend-backend communication through JSON-based data exchange, and implemented real-time leaderboard updates using JavaScript.

CERTIFICATES

- NPTEL – The Joy of Computing using Python (Elite Certificate).
- Fundamentals of Agile and Scrum (Certificate of Completion) – Gardeners Hub.

EXTRACURRICULAR ACTIVITIES

- Class Representative – Coordinated communication between students and faculty.
- Dance Club Representative, Nrtya Dance Club (GLEC), participated in college cultural events.
- Participated in college-level hackathons and technical events.
- Organized technical and non-technical college events.
